PLSC 197 / SODA 110N: Social Data, Technology, and Artificial Intelligence

Christopher Zorn

October 26, 2026

Concepts

Two factors:

- **Persona**: Assigning the LLM a specific identity, role, or character
- **Explanatory Style**: Asking the LLM to respond in a particular manner

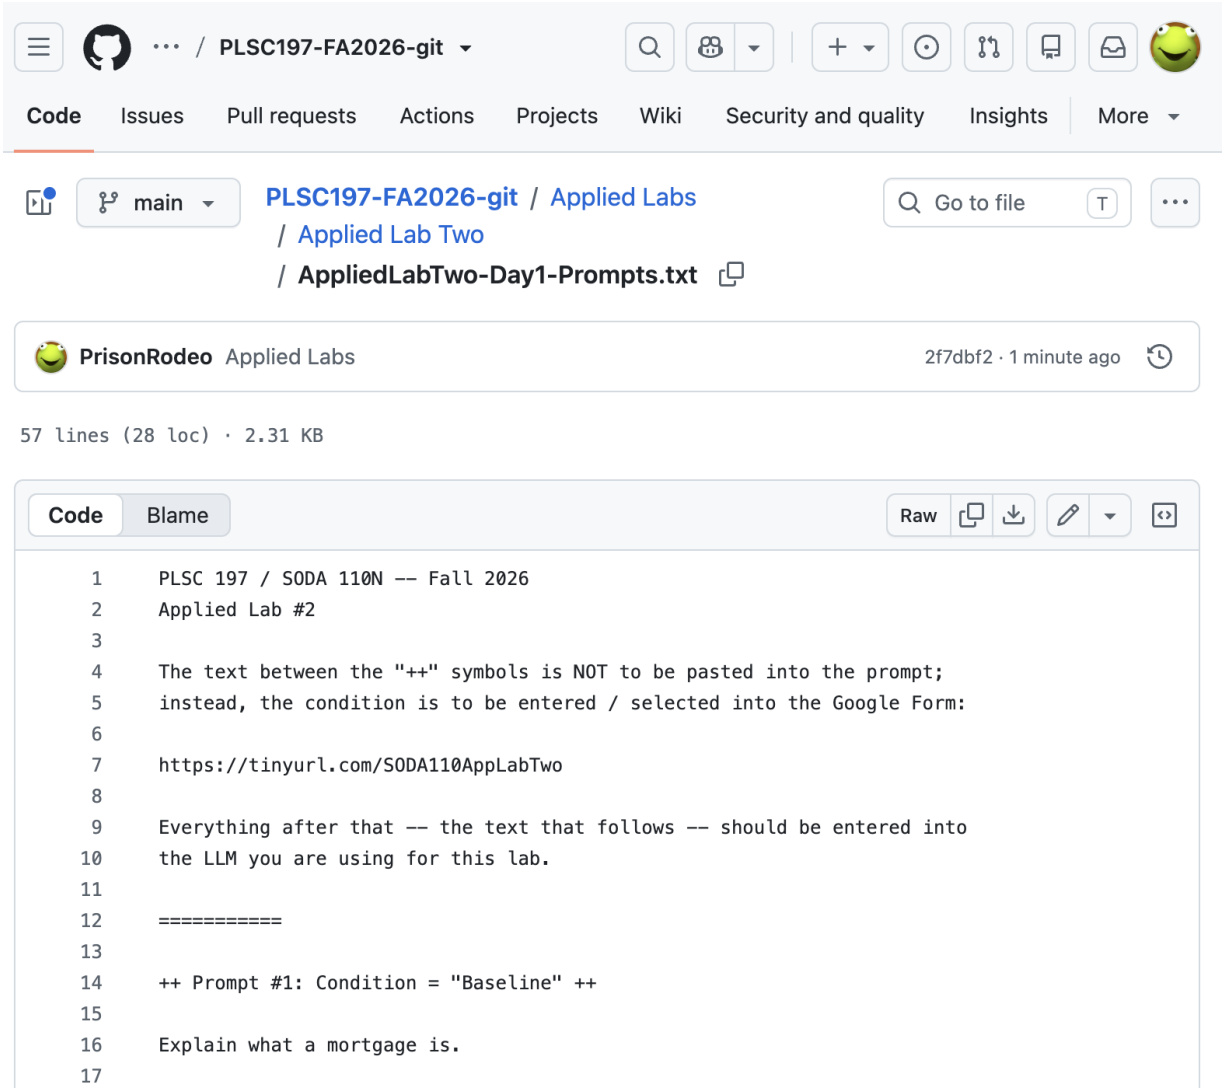

Each of these shape the nature of the LLM output.

Applied Lab Two

Instructions:

1. Open a browser window and navigate to one of {ChatGPT, Claude, Gemini} at Penn State's AI Studio.
2. Open a second browser window and go to the course Github repo, where you will find a folder for the second applied lab. Open the file called "`AppliedLabTwo-Day1-Prompts.txt`."
3. For each of the five prompts, open a new chat, enter the prompt, and record the output in the online form (link below).
4. For each prompt, also assess (on a 1-5 scale) the level of *formality* of the LLM's response, and its *confidence*.

The Prompts

```
1   PLSC 197 / SODA 110N -- Fall 2026
2   Applied Lab #2
3
4   The text between the "++" symbols is NOT to be pasted into the prompt;
5   instead, the condition is to be entered / selected into the Google Form:
6
7   https://tinyurl.com/SODA110AppLabTwo
8
9   Everything after that -- the text that follows -- should be entered into
10  the LLM you are using for this lab.
11
12  ===========
13
14  ++ Prompt #1: Condition = "Baseline" ++
15
16  Explain what a mortgage is.
17
```

Record Your Work

For Wednesday

"Bridging Exercise"

1. Choose a **domain**: (hiring, news, medicine)
2. Design and run two prompts
3. Record your results + notes
